Correctional Services

The only constant in today's office environment is change. New ideas, new people, new locations all demand an office landscaping system that responds with the flexibility and durability to accommodate reconfigurations and additions. Combining this with the natural beauty of solid oak results in a system of unparalleled warmth, richness and functionality.

Ultra-Frame® provides for all levels of the office hierarchy through a large selection of components, accessories and finishes. Every item in the line has been carefully designed to assure an aesthetically pleasing, comfortable and efficient work place.

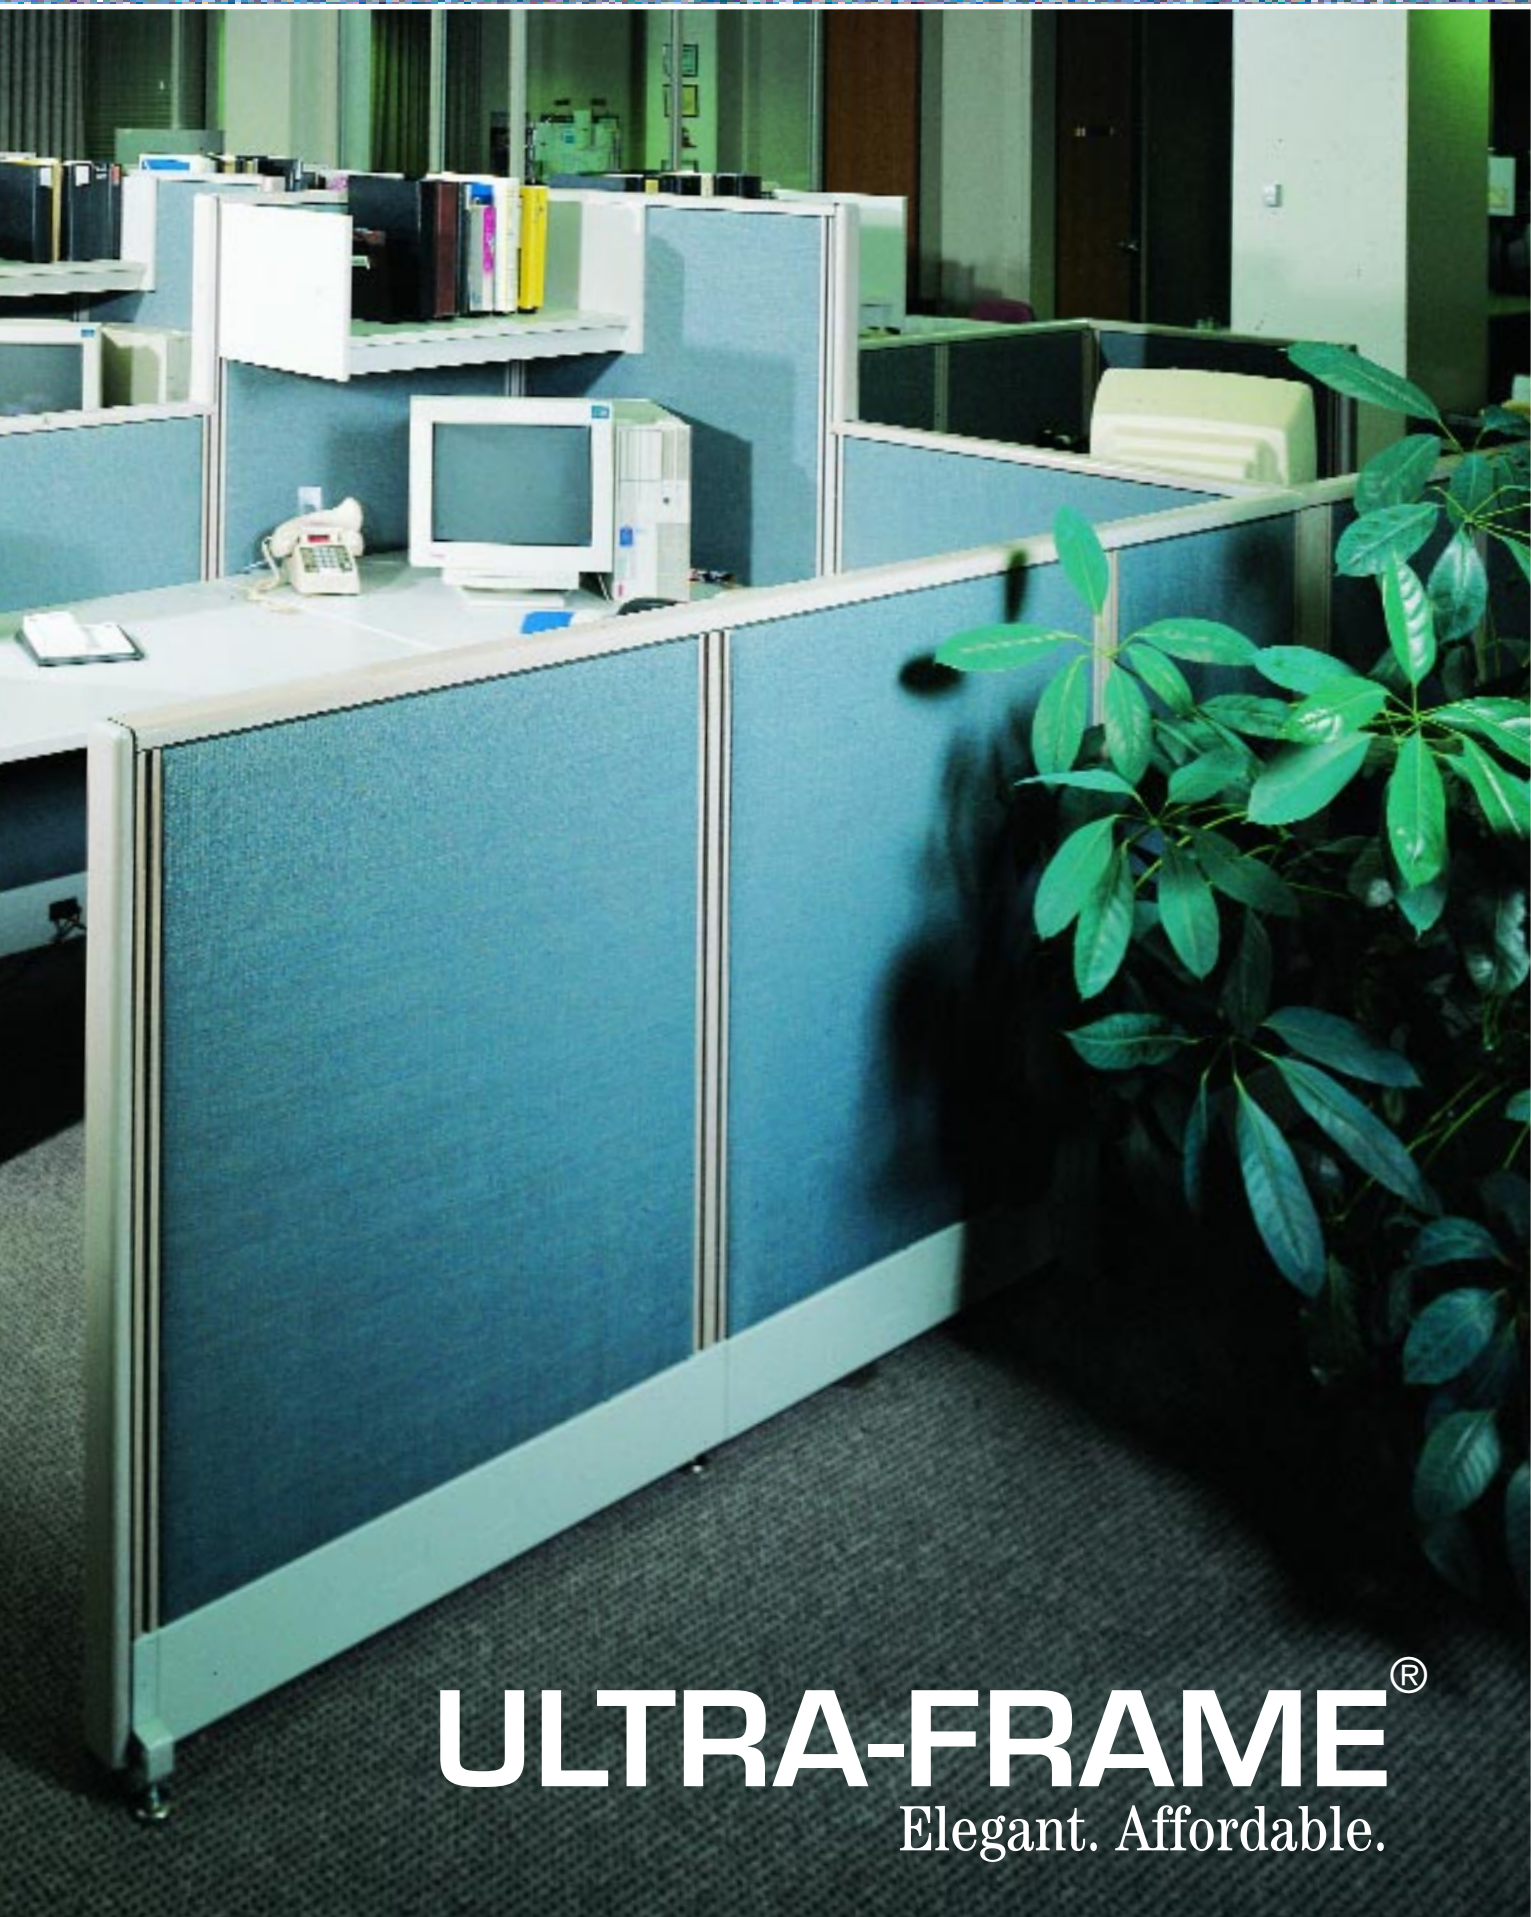

ULTRA-FRAME[®]

The bottom line.

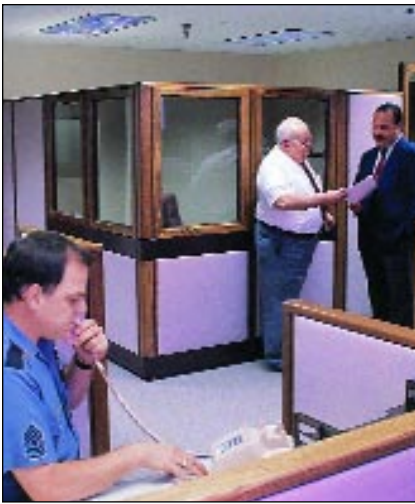

Superbly designed, meticulously crafted and accurately detailed components for all levels of office personnel.

ULTRA-FRAME[®]
Elegant. Affordable.

Albany County Sheriff's Department

Tackable, acoustic and glazed panels together with solid oak posts and softly radiused finishing rails form the backbone of the system. Acoustical privacy and superior strength are assured with the interior panel constructions and underlying steel structure of raceways and slotted standards.

Multiple sizes and shapes of workspaces are available to satisfy virtually any functional requirements. The D-shaped conference workspace supports information sharing and interaction while contributing to a pleasing aesthetic statement. Corner workspaces can accommodate computer terminals from laptops to large graphic workstations. With an optional keyboard tray mounted, the keyboard can be adjusted to any position and then conveniently slid away when not in use. Counter tops used on 42" high panels complement the workspace offering a convenient transaction surface.

ULTRA-FRAME[®]
*...truly works as beautiful
 as it looks.*

Study pedestals are available in mobile or worksurface suspended versions. Each offers several drawer combinations to hold everything from pencils to Electronic Data Processing files. Locks are standard.

Storage options include wardrobes, office cabinets and

panel hung units such as flipper door cabinets, bookshelves, display shelves and even tackboards. Melamine laminate finishes provide a wide selection of handsome cabinets which repel liquids and resist abrasions and stains.

Ultra-Frame's eight-wire electrical system is designed to be installed with only a single basic tool – a screwdriver – and then there are only two screws per raceway. The 4-circuit system features 2 designated circuits for general use and 2 isolated circuits for desk top computers and other data processing equipment. A universal power infeed brings power from the building to the raceway. Revolutionary Tracks carry power through the panel and allow for duplex, outlet or power entry connections. Twin conduit, flexible Track-to-Track connectors come standard with every Track. Receptacles for all electrical, voice and data transmissions are simply snapped in place. The raceway covers have knockouts to position the receptacles wherever they are needed.

The entire electrical system is recognized by Underwriters Laboratories Inc. (U.L.) for your utmost in safety assurance.

Power can be distributed through raceways at the baseline or belt-

NYS Department of Transportation

line levels or both for maximum flexibility in planning requirements.

Surge protection is always a concern with computers. Snap in modules ensure the isolated circuits are protected at all times.

Twistlock and Switchable outlets, light sensitive Theatre Lighting and many other specialized applications can be accommodated with ease. Ultra-Frame® responds.

Electrical outlet options suit vir-

tually any application with safety and durability in mind.

Data and telecommunications jacks may be configured to virtually any individual requirement.

Task lights mount under bookshelves or flipper door cabinets.

Ambient lights are encased in an oak frame and mount on top of 72" panels. They provide upwards directed light for overall room light balance.

ULTRA-FRAME[®] ...is elegance, that lasts.

New York's Correctional Industries program continues to be a leader through the United States. Early in the 19th Century the 'Silent System' was instituted in the Auburn Prison, where inmates were expected to reform their lives through work in silence. Inmate labor produced stoves, clothing, brooms and even whiskey barrels for private entrepreneurs. Over the past 170 years the program has developed to what it is today – a major manufacturer and service industry to the State and Local Government marketplace.

Corcraft products and services offer new opportunities within the inmate work force, to successfully develop marketable skills and work ethics. Through real life experience, our inmate employees are trained in all aspects of manufacturing. They operate under commercial standards for production, quality control and customer service. These program initiatives and the efforts of our work force have provided the State of New York with a successful 'Prison Industries'.

Within the New York State Government and approved markets, Corcraft has emerged as a competitive manufacturer of office furniture. After many years of extensive research, design and production, Corcraft proudly continues the legend of ULTRA-FRAME[®] ... a modular office landscaping system.

From system layout using sophisticated CAD equipment to manu-

NYS Teachers' Retirement System

facturing with state-of-the-art machinery to on-time delivery with Corcraft's fleet of tractor-trailers and installation by qualified personnel, Ultra-Frame[®] exemplifies the Corcraft philosophy of "Quality First".

From start to finish, Ultra-Frame[®] is in a class by itself. From basic clerical workstations to well appointed executive offices, Ultra-Frame[®] allows you to maintain an overall design aesthetic throughout the entire office.

Quality materials, attention to detail and a complete understanding of the demands inherent in today's complex office environment are evident in each and every component.

In accordance with Corcraft's policy of continual product improvement, Ultra-Frame[®] as presented in this brochure is subject to change without notice or obligation.
